

Sold a Single Family home in 2011 for approximately \$850k in Kimber/Gomes, Fremont, CA.

Summary:

What we assumed to be a quick and less than painful process eventually became very tiresome. My family originally put our house up for sale with the same realtor we went to when we first bought this house. However as time went by with an open house weekend after weekend, we found ourselves growing more and more impatient. We then began to ask ourselves, "What's wrong with our house?" We slowly began drown in a pool of doubt and that's when we decided to give you a call. With the Linda Young signs all over Fremont, we thought this was the best decision to make. You enthusiastically met with us and reassured us that our home was lovely enough for someone else to eventually call it their own. With the help of you and your team, we made some changes in our home including some remodeling and staging. These changes left our family in awe as our home became that much more beautiful. At this point, my family and I knew we had made the right decision to come to you. Despite having multiple different houses on the market at once, you still made the effort to make personal visits and displayed great character; not only were you extremely professional throughout the entire process, but you showed compassion and kindness. At one point, my family and I strongly believed we would have to sell our house a year later, but thanks to your great work and efforts, we were able to sell our house this year as planned. Although you were our realtor, we felt as if we found a friend within a business partner which made what is normally a difficult process, into a rewarding experience. My family and I sincerely want to thank you for selling our house, but more so for reaching out with a helping hand when we needed it most. Aside from being a great realtor, you're a wonderful person. We're extremely grateful to have had you the past few months and we know that others will feel the same.

A Very Grateful,

Han Family
